ABOUT ME

I'm frontend developer with more than 3 years of work experience. I have experience and understanding of complex front-end projects. I understand how to independently solve problems using different technologies. I write working code, I can configure projects, optimize code, make architectural decisions. I have experience in webpack setup for production and dev mode, work on a size of a bundle, work on app loading speed, writing tests (unit, e2e). I like working in a team, discussing new ideas and solutions, work with interesting and complex projects. I am constantly learning something new.

PROFESSIONAL SKILLS

TypeScript, JavaScript, React, Redux, Redux-Toolkit, Redux-Thunk, Axios, RTK-Query, Mobx, Webpack, Babel, HTML, CSS modules, SCSS, Jest, React testing library, Cypress, Loki, Webpack bundle analyzer, Storybook, ESLint, Stylelint, Git/GitHub, FSD-architecture, NodeJS, NextJS, Express, Husky, Figma, Responsive web design, Scrum, Unit testing, e2e testing, Agile

LANGUAGES

- English – *B2 (upper intermediate)*

- Russian – *native*

Kirov State Medical University (2017), *master's degree*

WORK EXPERIENCE

Dec 2020 - Jan 2023 / Frontend developer / Akbarsbank

Responsibilities:

- Development of new features and support for the client side of the application
- Refactoring of existing code
- Analysis and evaluation of tasks
- Bug fixes
- Teamwork, code review
- Configured the webpack configuration for the application

Main stack:

- React
- Redux Toolkit, RTK Query
- TypeScript

Achievements:

- configured the webpack configuration for the application (accelerated the initial loading of the site by 20%)
- increased the number of unit/e2e tests to reduce bugs,
- improved readability and quality of a code

Nov 2019 – Dec 2020 / Junior frontend developer / DialApps

Platform for psychological courses and trainings.

- Added the functionality such as of tracking progress by courses, due to which it increased the number of students who complete courses. Added new functionality to the homework list: filtering by students, sorting by deadlines, the ability to send reminders to the student.

- Bug fixes
- Teamwork, code review

Main stack:

- React
- Mobx, Axios
- TypeScript
