ABOUT ME

I'm frontend developer with more than 2 years of work experience. I mainly develop with React and Redux. I have experience and understanding of complex front-end projects. I understand how to independently solve problems using different technologies. I write working code, I can configure projects, optimize code, make architectural decisions. I have experience in webpack setup for production and dev mode, work on a size of a bundle, work on app loading speed, writing tests (unit, e2e).
I like working in a team, discussing new ideas and solutions, work with interesting and complex projects. I am constantly learning something new.
